PURKINJE WINS TEPR AWARD FOR BEST E-PRESCRIBING SYSTEM

CareSeries™ honored for its ability to deliver evidence-driven decision support to physicians at the point of care

ST. LOUIS, Mo. – May 25, 2007 - Purkinje®, a leading managed software and professional services partner of physicians, today announced it received a TEPR (Towards the Electronic Patient Record) Award for the best e-prescribing system. CareSeries™ was honored for its ability to expedite the prescribing process and its unique approach to delivering evidence-driven decision support to physicians at the point of care.

CareSeries features the only e-prescribing solution that has been shown in peer-reviewed studies to make a substantial impact on the quality, safety, and cost of patient care. The award-winning solution goes well beyond the simple automation of paper-based processes to present context-specific integrated clinical decision support at the point of prescribing based on the best published evidence. CareSeries gives doctors visibility into the cost, efficacy and adverse effects of various medication-based therapeutic alternatives. This information is seamlessly integrated within physician workflow, enabling informed decision making without slowing down busy doctors.

“After placing second in this category last year, our team is thrilled to be taking home top honors this year,” said Bryan Dieter, CEO of Purkinje. “Winning such a prestigious award reaffirms Purkinje’s ability to provide physicians with solutions that save time, reduce costs and, above all, improve patient care.”

For 23 years, the Medical Records Institute and TEPR Conference has provided a global forum for healthcare consumers, providers, and technology vendors looking to improve quality of care through advanced information technology solutions. With an unsurpassed educational program as well as a comprehensive exhibition showcasing close to 200 leading EHR/EMR and related technology vendors, TEPR is considered one of the health IT industry’s premier events. Each year, the TEPR Awards are presented to the top three vendors in a number of key categories including personal health records, document imaging, mobile applications and more.
